

# SUNSHINE GUIDE TO THE DISNEYLAND RESORT AREA, CALIFORNIA

LOCATION: Disneyland is located in the city of Anaheim, part of the Los Angeles metropolitan area in southern California. The park was the first (1955) and original Disney theme park. Disneyland is much more compact than Walt Disney World in Florida, and all of the attractions may be enjoyed with a single “passport”. Elevations are close to sea level.

COMMENTS: Bright sunshine is likely on 70% of the year’s daylight hours. This might range from a low of 68% in January, to a high of 76% in August. The year’s lowest temperature should be close to 33°, and the highest should be near 102°. Sensible afternoon temperatures (the ones you actually feel) will be essentially the same as actual ones. The park enjoys the same fine weather as the rest of the Los Angeles metropolitan area, with more than two days out of five being clear. Although winters here are about 5° cooler than in the Orlando area, summers are far more pleasant. They are drier (about half the summer days in Orlando get at least some rain), much less humid and muggy, and quite a bit sunnier. Even so, summer afternoons can get hot in the bright sunshine, and morning and evening visits tend to be far more pleasant.
